

Track system serie PRO-Track

PRO-Track is a three-phase or Dali track system completely compatible with adapters available on the market with Eurotrack standard. The complete range of innovative accessories such as the reversible "L" and "T" connectors from right to left connector offer maximum freedom of installation and to create the desired geometry. The possibility of using the same track for both 3-circuit systems and DALI dimmable systems with only the change of power connectors makes the system versatile, comfortable, practical and convenient.
