Prim@tek

who we are

PrimOtek is an Italian company specialised in the production and design of lighting equipment in numerous sectors, including:

- Civil
- Industrial
- Retail
- Gardens
- Pools
- Theatres, stadium, sports halls, tennis courts
- Offices, schools, private and public institutes

With over thirty years of experience, PrimOtek, thanks to its well-established technical expertise, has three distinctive characteristics:

- The customization, an expression of tailor-made design which, in the field of lighting engineering, represents an important added value. The starting point is the design requirement, and the final result is the creation of a unique outcome!
- The lighting project, carried out by a team of experts within the company, that turn requests and needs into concrete solutions.
- The versatility and elasticity in custom design that allow us to develop innovative solutions and satisfy different kinds of requests.

PrimOtek offers solutions for the furniture industry and collaborates with architects, designers, companies and engineering firms across the world, creating high quality products and pursuing a culture of quality and creativity that differentiates it in the market.

All of this results in products:

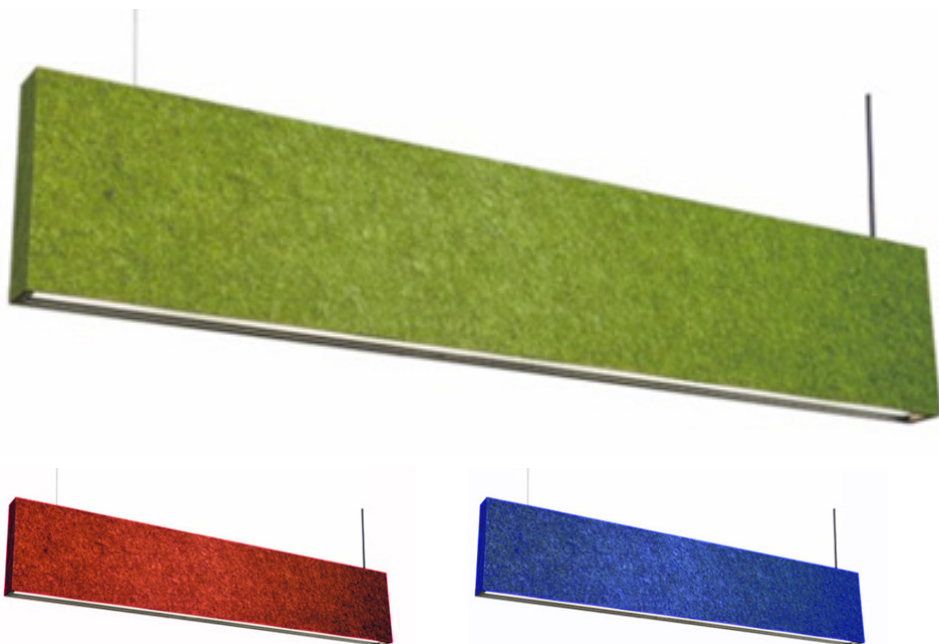

- with an elegant and functional design
- which observe the requested technical requirements
- which are manufactured using top-quality components, ensuring long-term reliability and efficiency

All our products are certified.

Verber is a collection of sound-absorbing panels that combines high-efficiency technology with porous materials in order to reduce noise pollution and reverberation, while also paying close attention to visual and aesthetic aspects.

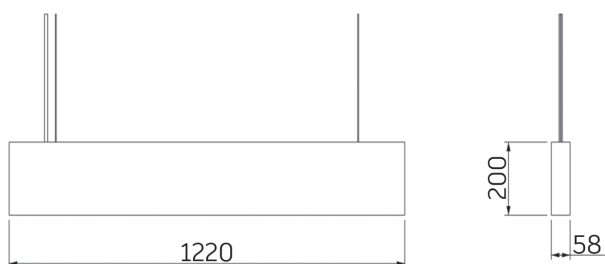

- acoustic absorption improves sound quality and reduces reverberation
- the material is certified fire-resistant
- choice of white light temperature
- adjustable light intensity
- the design and colours of the device are customizable

Verber - Quadra

verber-Quadra is an elegant linear suspension lamp entirely made of sound-absorbing and fire-resistant materials. Integrated LED lighting that projects downward with anti-glare optics.

Verber - *Petalo*

Suspension lamp with curved, elegant, and sinuous petals that evoke the interior of a flower in the sunlight. Entirely made of sound-absorbing material, it integrates a circular LED light source within the ring support. The PETALO suspensions are particularly suitable as high-impact lamps, either as a focal point above a table or grouped in compositions to define lounge and meeting areas in communal spaces.

Esse collection develops around a metal profile with a sinusoidal shape, within which a dot-less LED light source is perfectly integrated, guaranteeing a uniform light emission, without visual interruptions.

Esse Collection: Excellence, Design, Innovation

- **Structural Light Integration:** The light source is designed to fit perfectly into the structure, creating a unified body between shape and light.
- **Sinuous and Homogenous Design:** A soft and fluid line, conceived for those seeking a welcoming aesthetic, free of sharp edges, capable of enhancing any space.
- **High Level of Customization:** Versatility lies at the heart of the collection, with a high degree of customization in terms of colour finishes, dimensions, and tailor-made technical solutions.
- **Smart Lighting with Casambi Technology:** Thanks to the integration of the Casambi system (based on Bluetooth Low Energy), it is possible to create complex wireless lighting networks. This technology enables remote control and precise adjustment of light intensity in a simple and intuitive way.

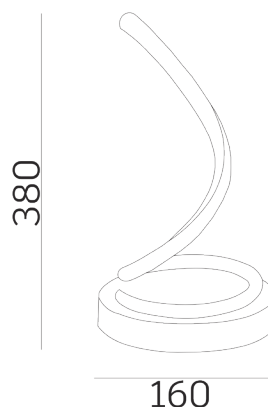

esse-Teseo

The elegant Esse-Teseo table lamp is the ideal furnishing complement for refined interiors. Its essential and sophisticated design integrates perfectly into a variety of settings.

It is available in two versions: with a classic switch or with Wi-Fi control via the Casambi app. The LED light source allows adjustment of the white colour temperature across three levels, using the physical button in the standard version or directly via the app in the smart model.

The stem is customizable in two finishes: white (W) or black (B).

esse-Arianna

The esse-Arianna LED floor lamp, with its modern and refined design, fits harmoniously into any setting, from classic to contemporary spaces. It is available in two versions: with a classic switch or with smart Wi-Fi control via the Casambi app. The LED light source offers maximum flexibility, allowing selection of three different white colour temperatures via the integrated button (on-off version) or via the app (Wi-Fi version).

The structure is available in two colour finishes: white (W) or black (B).
